I can definitely present the November/December results in context with the results presented during the last meeting.

Hi Chris,

At the November CAG meeting, I believe Janis asked Aerojet to discuss the most recent (November/December 2021) Area 40 sampling data at a future CAG meeting. Also, I think it would be helpful to revisit the information you presented in November since there is a lot of data.

I'll ask Janis for information about the type of LUC she is interested in discussing.

I didn't know Jim Rohrer was getting promoted. Peter will have a larger role at future technical and CAG meetings.

Thanks,  
Grace

Hi Grace – I am happy to be available for Q&A regarding Area 40. We don't really have any additional data to share other than what was shared last time. I can have the maps available, which may prompt some questions. Did they provide any insights on what details they were interested in discussing?

I am definitely available to discuss land use plans and PGOU remedy.

Can you find out from Janis which type of LUC she is interested in discussing? We have residential, commercial, park, open space, vapor mitigation requirements, soil management requirements, excavation restrictions, etc. Each LUC is crafted to the particular piece of property. Perhaps the CAG is interested in the structure of the LUC rather than an LUC for a particular piece of property? FYI – Jim has been promoted and this will be his last CAG meeting. Peter MacNicholl is going to manage the entire Aerojet Superfund for DTSC going forward.

Happy to help, just need some additional direction. Thanks, Chris

**Subject:** [EXTERNAL] January 19 CAG meeting agenda topics and request

Dear Chris and Jaco,

I'm contacting you about the upcoming January 19 CAG meeting.

The CAG asked if Chris could give a longer and more detailed presentation about the Area 40 remedial action groundwater, soil vapor and ambient air data. Chris gave an overview of the Area 40 sampling at the November meeting and the CAG expressed interest in getting more detailed information. Is it possible for Aerojet to prepare a more detailed presentation on short notice? We'll work with the CAG to get these requests out sooner in the future.

For the 2021 Five-Year Review, the CAG expressed concerns that certain areas are being cleaned up to commercial or industrial levels in OU5 even though residential development is planned. Janis will lead this discussion. She's asking Daewon and Chris to discuss and answer questions preferably with maps. Daewon would appreciate Chris' help when discussing (and identifying) subareas of OU5 and the specific plans for those parcels.

Janis is asking DTSC to present on LUCs. Daewon has emailed Jim about this topic, but DTSC may ask you to co present.

Thanks,  
Grace
